

J40 RHD Centre LCD / HVAC Fascia - Rev B

Units mm | Quote + template release | Vehicle cutting HOLD

CONTROLLED SCOPE

Right-hand-drive vehicle: instrument/speedometer pressing stays original.

Left glovebox, instruction plate and small compartment stay original.

Remove ashtray; modify only existing centre radio/ashtray footprint.

Nominal fascia envelope 275 x 220 x 1.5 CR4 steel - template controlled.

Nominal LCD opening 230 x 132 - actual screen controls final aperture.

Removable 230 x 34 switch strip; four bought switch apertures measured.

Two eyeball vents mount separately under dash; no new main-face vent cuts.

Preferred vent connection: 63.5 / 2.5-inch hose after neck trial fit.

HOLD BEFORE METAL OR VEHICLE CUT

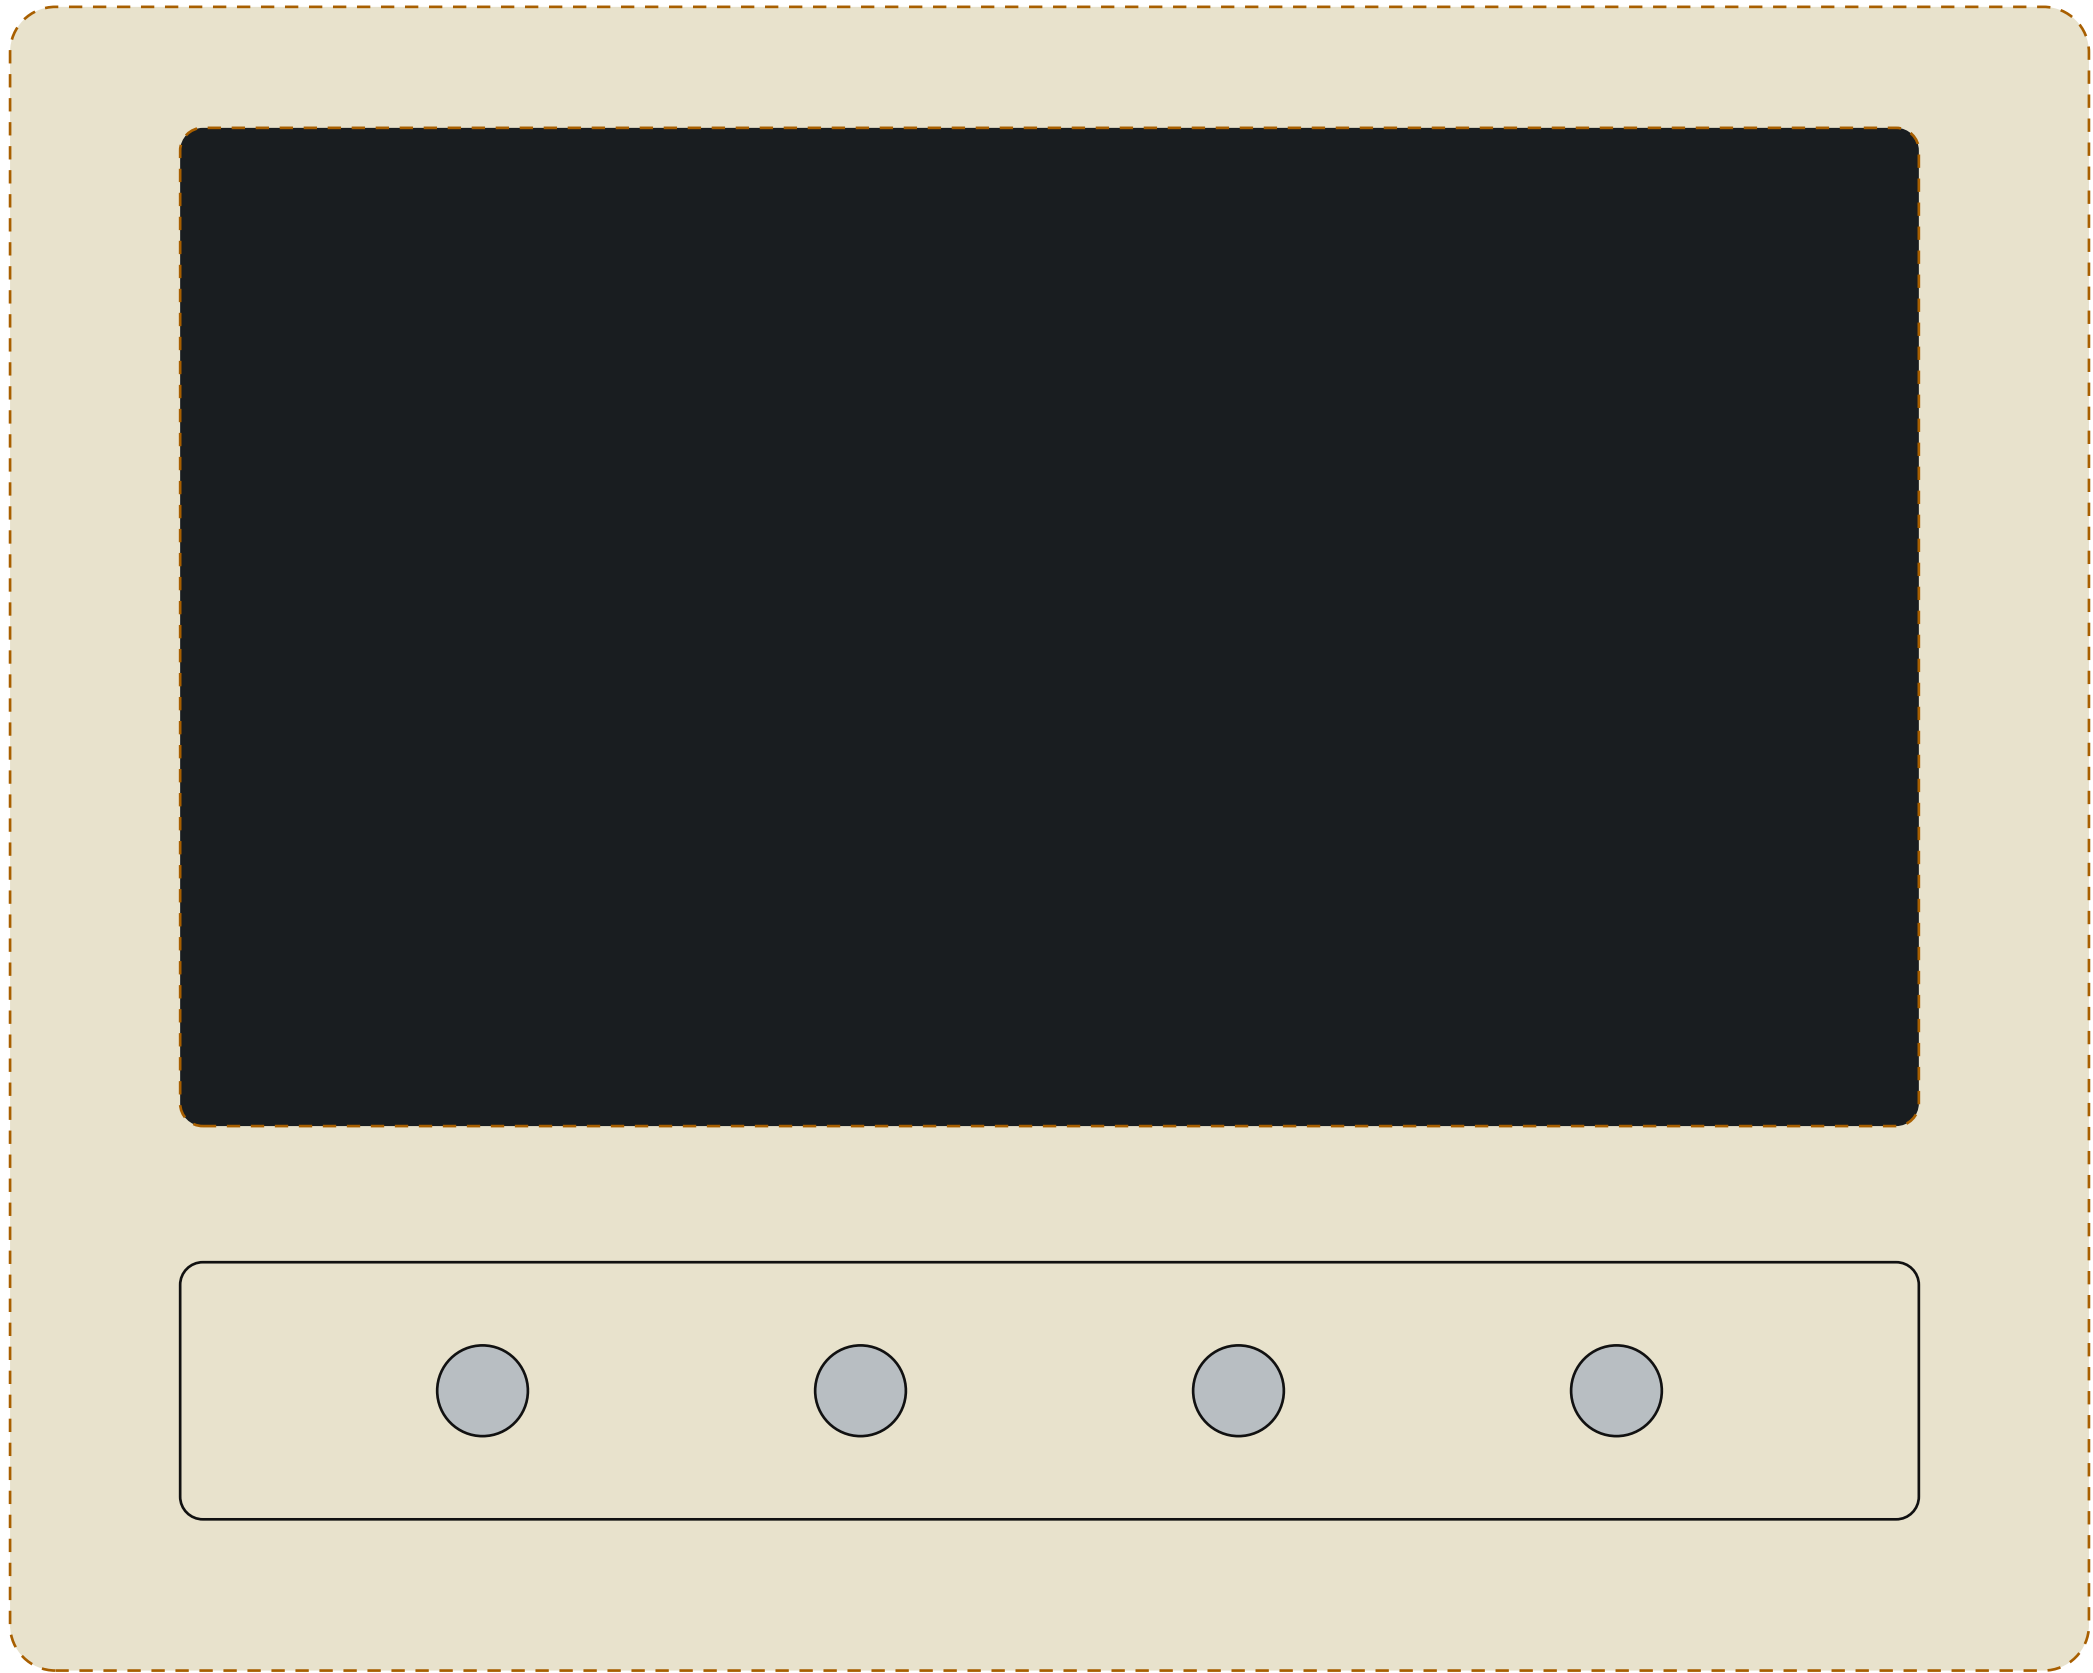

M1 actual centre-zone contour and usable lands

M2 LCD visible aperture, rear body, mount pattern, plugs

M3 switch bush diameter, anti-rotation and rear body depth

M4 vent face, aperture, neck OD, rear depth and hose bend

M5 full rear interference sweep and 1:1 owner-approved prototype

Orange/dashed geometry and all HOLD_* DXF layers are reference only. Do not cut them until the release schedule is signed.

Design intent on owner's actual RHD dashboard

Concept overlay - do not scale

WHAT CHANGES

1. Ashtray and centre radio openings become one body-colour CNC insert.
2. Horizontal 9-inch LCD sits flush in the upper centre insert.
3. Four bought industrial switches sit on a removable lower strip.
4. Two small directional vents mount below the dash, outside the face cut.

WHAT DOES NOT CHANGE

- Left glovebox and its instruction plate
- Small original compartment beside glovebox
- Right speedometer/instrument pressing and steering-column notch
- Four original switch positions to the right of the instruments
- Outer dash sheet metal and character lines

The photograph establishes intent, not dimensions.

Final geometry comes from the vehicle template and actual parts.
